April 2026 – Present

Dashloc-Gen AI Multi-Location online Presence Platform, Bangalore

- Developed and maintained production-ready web application features using **Vue.js** and **Nuxt.js**.
- Built reusable and responsive UI components following component-driven architecture.
- Implemented state management using **Pinia** to efficiently manage application-wide data.
- Integrated REST APIs and handled asynchronous data fetching for dynamic user experiences.
- Collaborated with backend developers and designers to deliver user-facing features aligned with business requirements.
- Participated in debugging, code reviews, feature enhancements, and performance optimization.
- Used Git and GitHub for version control and collaborative development workflows.

PROJECTS

QKart E-commerce Application (Frontend)

Oct 2025

- Built a scalable e-commerce interface using **ReactJS**, **JavaScript**, **HTML**, **CSS**, **Bootstrap** for product listing, cart management, and checkout workflows.
- Implemented debounced search, reducing API calls by **~30%**, and improved UI responsiveness via efficient state handling and conditional rendering.
- Deployed the application on [Vercel link](#)

Expense Tracker Web Application

Feb 2026

- Developed a web-based expense tracker using **React.js**, **JavaScript**, **HTML**, **CSS**, **Recharts**, **React-Modal**.
- Implemented **CRUD operations** with wallet balance management (default Rs. 5000) and localStorage persistence for transaction history.
- Visualized spending trends using interactive **Pie Charts** and **Bar Charts**.
- Designed a fully **responsive UI** for desktop, tablet, and mobile, compliant with assessment requirements.
- Deployed the application on [Vercel link](#)
